DETAILED ACTION

Allowable Subject Matter

1. Claims 2-20 are allowed.
2. The following is an examiner's statement of reasons for allowance:

U. S. Patent No. 6,711,528 to Dishman et al. is the reference closest to the claimed invention. Dishman et al. disclose a method of blind identification of sources within a system including P sources and N receivers, comprising the steps of identifying the matrix of direction vectors of the sources from the information proper to the direction vectors a_p of the sources contained redundantly in the $m=2q$ order circular statistics of the vector of the observations received by the N receivers. However, Dishman et al. do not teach wherein $m=2q$ order circular statistics are expressed according to a full-rank diagonal matrix of the autocumulants of the sources and a matrix representing the juxtaposition of the direction vectors of the sources as follows: $C_{m,x} = A_q \zeta_{m,s} A_q^H$; and including all of the other limitations in the respective independent claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
